DANIEL EDUARDO SOLÍS PRADO

QA Automation Architect | Agentic Quality

Costa Rica +506 7014-8563 danielsolisprado@outlook.com GitHub: dsolisp

PROFESSIONAL SUMMARY

QA Automation Architect with 14+ years in enterprise-scale testing & quality systems. Expert in architecting end-to-end automation strategies for global platforms encompassing Identity, Security, and Fintech modules. Bilingual (English/Spanish) with a 100% track record working with USA-based clients. Specialist in Java (21), Playwright, Python, and AI-driven engineering patterns.

CORE SKILLS & TECH STACK

Languages:	Java (v8-21), Python (3.x), TypeScript, JavaScript, C#, SQL (Oracle, PostgreSQL), Ruby
Automation & DevOps:	Playwright, Selenium WebDriver, Cypress, WebdriverIO, Jenkins (Groovy), AWS (S3, DynamoDB, Lambda), Docker
AI & Agentic Testing:	deepeval, ragas, promptfoo, Claude CLI/Code, Cursor IDE, Google Antigravity, Copilot

PROFESSIONAL EXPERIENCE

ACTIVISION BLIZZARD — Senior QA Automation Engineer (Platform Specialist)

Feb 2024 – Present

- Lead test automation strategy for core gaming platform functionality on Battle.net and internal repository security scanning workflows.
- Architected a highly decoupled, concurrent automation framework utilizing Java 21 and Playwright designed for cross-browser parallel execution.
- Enforced a strict horizontal architecture across repositories by isolating selectors into 1:1 parity locator classes, keeping Page Objects (POM) action-only, and restricting all expects/assertions exclusively to Spec/Test classes.
- Built a custom AI-agent workflow (Claude/Cursor) to streamline edge-case scenario creation and automate complex test data generation, reducing manual script maintenance by 45%.
- Implemented Google Antigravity (PoC) for self-healing locators, reducing false positives by 25% in the CI/CD pipeline.

CLASSY-GOFUNDME — QA Automation Consultant

Apr 2022 – Jan 2024

- Led the transition from Karate/Java to Playwright + TypeScript, reducing regression time by 70% for a major USA fintech client.
- Leveraged Claude 3.5 for automated refactoring of legacy modules, ensuring zero technical debt in the new architecture.

GORILLA LOGIC — Senior Test Automation Engineer

Apr 2016 – Mar 2022

- Developed automated validation layers to ensure data integrity between microservices and Oracle Databases, catching 15% more backend discrepancies.
- Built a Python/Pandas tool to correlate Jira defects with Allure data, predicting failure patterns and optimizing test coverage.
- Acted as a technical lead for a distributed team, communicating exclusively in English with USA stakeholders to align project goals.
- Managed test infrastructure on AWS, utilizing S3 for report persistence and DynamoDB for session state management.

GROWTH ACCELERATION PARTNERS (GAP) — QA Engineer

Mar 2012 – Mar 2016

- Developed functional suites using Selenium (Java/Python/Ruby) for high-profile USA accounts.
- Automated test environment setup using AWS EC2 images (AMI) and Bash scripts.

TECHNICAL PROJECTS & LLM RESEARCH

LLM Agentic Testing & Evaluation Architecture (GitHub Research Project)

- **Objective:** Built a local evaluation playground to benchmark LLM agent stability, non-deterministic behaviors, hallucinations, and RAG pipelines using deepeval, ragas, and promptfoo.
- **Non-Deterministic Validation:** Implemented LLM-assisted metrics to systematically evaluate conversational outputs for faithfulness, answer relevance, and context recall using ragas frameworks.
- **Adversarial Red Teaming:** Configured automated matrix test suites within promptfoo to simulate jailbreaks and prompt injection vulnerabilities, scoring guardrail efficacy and backend robustness.
- **Bias & Safety Benchmarking:** Leveraged deepeval pipelines to build repeatable test suites for monitoring hallucination toxicity, establishing quantifiable quality metrics for generative AI features.

CERTIFICATIONS & EDUCATION

- **ISTQB Certified Tester** – Foundation Level (CTFL)
- **Cisco Certified Network Associate (CCNA)** – Routing and Switching
- **Bachelor's Degree in Computer Engineering** – Universidad Americana (CR) | 2008–2012
